## APPLICATIONS

### 710

- Application that allows users to have detailed logs of personal vehicles and vehicle maintenance. Gives the user the ability to store images of their vehicles and attach records or receipts for said maintenances.
- Worked in a team of 5 developers to create a web application with functional front-end and back-end
- Technologies used: Vue3, HTML, CSS, Animate.CSS, MongoDB, JavaScript, Firebase, Auth0, Bootstrap, Node.js
- Personally fulfilled the role of learning Firebase and being able to integrate it into the project, and helped create front-end and back-end functionality.

## SUMMARY

Software Developer with 500+ hours of experience able to build web applications from the ground up - information gathering, planning, design, development, testing and delivery and maintenance. A fast learner with strong time management and multi-tasking skills. Strong work ethic in team or individual settings to drive product success and process efficiency.

## EXPERIENCE
